FCT CF FLASH GOLD ADDITIVE (F G A)

FCT CF FLASH GOLD ADDITIVE is used as a good gold additive to get a golden color and a very good hardness. It is mainly used in decorative gold flash process. Decorative gold flash processor series utilize a special gold complex which is combined with other competable metal and complexes to produce stable color gold flashes in all standard used in jewellery applications.

OPERATING CONDITONS	OPTIMUM	RANGE
SALT ANY NUTRAL OR ADDITIVE SALT	AS PER COMPANY ADVISE	
G P C	0.05- 1.0 GM/LTR	1 GM
F G A	0.5- 1.5 ML/ 1GM	1 ML
AGITATION	AIR	

F G A is an alloy of silver and cobalt. It can be used in all types of alkaline and nutral flash gold bath.

Since it is a gold alloy composition it will give very good hardness.

Operating instructions

For optimum and consistent color it is recommended to add F G A in first flash bath.
